Hoosier Introduces New 18” GT1 Slicks!

LAKEVILLE, IN – Hoosier is proud to launch an all-new **18” slick** for GT1 and Historic Prototype cars competing in circuit racing applications. The new slick is fitted with an advanced tire construction engineered to optimize balance, enhance drivability, and instill confidence in drivers of any experience level.

The new **S2** compound has been specially formulated to “activate” quickly, offer greater connectivity on various track surfaces, and provide consistent levels of traction over a race stint with minimal degradation. The result is not only a faster lap time compared to the leading 18” GT1 slick but also a quicker overall race average. The new **S2** rubber will also be available in the traditional 16” GT1 slick sizes, replacing the previous M compound.
